Some personal stories demand to be told but writing them is often difficult. Honouring these experiences to learn about oneself can be highly beneficial.

Award-winning author A. R. Levett draws upon research to demonstrate the benefits of writing for self-discovery, the uses of catharsis, disclosure, symbolic repair, and bearing witness, and the possibilities of reauthoring experience through writing.

Please note, A. R. Levett is not a therapist and is not qualified to help you deal with traumatic experiences.
